Bid #2024-03/4

Snow Plowing Streets and Cul-de-sacs

Addendum #2

Q – Can bidders supply information and rates for additional snow plowing equipment, such as loaders?

A – Yes, the Town encourages bidders to supply rates for additional equipment (with operators) related to snow removal operations. These can be supplied by attaching additional sheets to the submitted Proposal Sheet. This additional equipment could include loaders, backhoes, skid steers, and triaxles; if rates differ depending on attachment, please specify. For example, rates for standard bucket versus snow pusher or snow blower attachments for the loader/backhoe/skid steer. Bidders are advised of two areas where smaller equipment may be requested, as available. These are Steele Boulevard (off of Farmington Ave), and Main Street between New Britain Rd and Farmington Ave (not in East Berlin). These are commercial-oriented zones with on-street angled parking that the Town is responsible for plowing.
