Dear Jim Mahoney,

Thank you for participating in the PPA Orchard Commodity Survey for invasive moths, ceryambicid beetles, and fruit tree phytoplasmas last spring and summer.

Many insects, including native moths and beetles, were found in the wing, cross-vane, and funnel traps throughout the season; however, we are happy to report that none of the target non-native moths or beetles were found.

It is very important that we have access to sites for these surveys that monitor what is going on in our natural environment. We sincerely appreciate your participation in our survey.

Feel free to contact me if you have any questions about the 2020 survey. I can be contacted at 203-974-8483 or by email at Gerda.Magana@ct.gov.

Best wishes,

Gerda Magana
State Survey Coordinator
