Bid #2023-06
Water & Sewer Utilities Study

Addendum #2

- Does the study have to be primed by an engineering firm? **No**
- The scope of services on page 4 lists several items, without a description of the actual services to be performed. I assume you just want the consultant to review each of these items and not actually develop specific items (such as a capital improvement plan or an operating budget). Is that correct? **Yes**
- How many meetings/presentations are anticipated? **No set amount**
- Are all meetings/presentations anticipated to take place onsite/in person? **No, not necessarily**
- Does the Town have estimated timing for the study or any deadlines or milestones it would like to meet for deliverables? **NEGOTIABLE---preferably before the end of the Fiscal year June 30,2023**
- Have formal water and sewer studies related to the scope of services been performed by an outside firm in the past? If so, when, by whom and what was the award amount? **YES Last attempt in 1996—Price UNKNOWN**
- Has a budget/budget range been set aside for the project? **Not at this time**
