Neighborhood Watch Contact Sheet

In forming a neighborhood watch, we recommend that one or two people take charge of the group and be the point of contact with the police department. Below you will find a section to add your contact information. These one or two leaders will be in charge of setting up and maintaining a system of communication between all of the members involved. This can be a group text message, a group messaging application, Facebook group, etc. Once these groups are established, anyone in them will be able to update the neighborhood with important information or alerts. We encourage you to allow our local Community Relations Officer to join these groups so they can monitor what is going on as well as alert the neighborhood and pass along information from the police department.

Name or Location of your Neighborhood:

Leader(s):

Name: _____

Address: _____

Phone Number: _____
