

Attention Berlin Residents 55 years of age and older the Berlin Senior Center Vaccine Clinics are full. The Central CT Health District will be conducting other clinics in Berlin starting sometime in late April. We do not have any more information to share with you at this time as to the dates/time or location of these clinics. Once we have that information, we will definitely let residents know through the different avenues available to us. We understand your frustration in attempting to get an appointment at this time so we have included other options available to you to secure an appointment at other vaccine sites in the area.
